

Giant Food Stores, LLC

Carlisle, PA

Cam-Tek Systems, Inc. has been servicing the surveillance systems for Giant Food Stores, LLC. since 1994. This chain of over 140 stores averages 64 cameras per site. To date, these individual stores have been equipped with highly reliable, Panasonic DVRs, packed with plenty of storage to give Giant's field staff the archival storage they require for

incident query. High quality, long term video storage translates to higher conviction rates.

Understanding that technology is dynamic, and recognizing the inherent benefits of IP Video networks, Giant is converting to this technology at select stores.
